

PERFORMANCE MATTERS

Speed is a ranking factor for S.E.O.

Search engines levy a penalty on slow websites. It will directly impact your ranking in major search engines.

QUOTE: "Speed is definitely a ranking factor? YES." John Mueller, [Google](#) 2019

A VERY SLOW loading website is a NEGATIVE ranking factor.

PERFORMANCE MATTERS

User Experience & Traffic

Waiting for content to load becomes frustrating.
Creates a bad user experience.
Users are likely to close the window or click away.

BBC discovered that they lost 10% of their total users for every additional second it took for their pages to load.

53% of visits are abandoned if a mobile site takes longer than 3 seconds to load.

Source Google

A website receive more traffic and improves visitor satisfaction levels.

PERFORMANCE MATTERS

User Experience & Traffic

1s to 3s	The probability of bounce increases 32%
1s to 5s	The probability of bounce increases 90%
1s to 6s	The probability of bounce increases 106%
1s to 10s	The probability of bounce increases 123%

Decreasing Page Load Time drastically increase conversions.

HOW FAST YOUR WEBSITE LOADS?

Free Online Tools

You can check how fast your website loads, and several other performance metrics with some of the most popular FREE online tools.

Webpagetest

GTmetrix

Pingdom

Google Page Speed Insights

Overall loading time, Time to First Byte (TTFB), page size and “First contentful paint” are areas of interest.

WHAT AFFECTS YOUR WEBSITE LOAD SPEED?

External / Third-Party Script

Ads, analytic scripts, widgets, tracking, fonts, javascripts,
and more...

They have a huge impact on website performance.

WHAT AFFECTS YOUR WEBSITE LOAD SPEED?

Media / Videos & Images

Images, Videos bring beauty, life, and more engagement to WordPress post and pages.

The main issues are their size, weight and too many of them in one page.

Images & Videos contribute a lot to slow page load speed.

WHAT AFFECTS YOUR WEBSITE LOAD SPEED?

Coding Standards / Plugins / Themes

Plugins & Themes bring more functionalities to your blog.

But many of these plugins or themes
are not coded for performance.

They are often bloated with unused functionality
published on every page.

Poorly coded plugins can impact the speed of your website.

WHAT AFFECTS YOUR WEBSITE LOAD SPEED?

Web Hosting / Server Resources

Choice of Shared, Dedicated hosting, Virtual hosting,
or Cloud provider.

Servers, CPU, Memory and Network Bandwidth.

Web Hosting is the foundation of your website.

WHAT AFFECTS YOUR WEBSITE LOAD SPEED?

These are just a **few** of what might be the cause of your website to load very slowly.
